

DURA-EDGE

Typical Calcined Clay Issues:

- Migration and buildup
- Breakdown/Contamination
- High application rate

The Fair Ball Solution:

- Highest density on the market of 44-46 lb/ft³
- Reduced migration due to wind and rain
- Greater hardness provides more durability and less breakdown
- Increased coverage due to larger particle sizing
- Application rate is greatly reduced from industry standard

Use as a stand-alone conditioner or combine with ProSlide Classic expanded shale topdressing for greatest infield playability and moisture management.

Delivery Options:

- 50 lb. Bags
